## ACADEMIC INFORMATION

### ADMISSION

A pass in the 10<sup>th</sup> standard or any other equivalent qualification.

### AGE LIMIT

No age limit.

### Architectural Assistantship (Sandwich)

➤ 50 % of the seats in Architectural Assistantship are reserved for the candidates sponsored by industries.

### DURATION OF THE COURSE

➤ The full-time Diploma course extends over a period of three years with a common first year of study of two semesters duration and four semesters of branch study during the second and third year. Each semester will be of 16 weeks duration for the study of both theory and practicals as per the syllabus prescribed by the Chairman/Autonomous Examinations.

### RE-ADMISSION OF CANDIDATES

- A student who had discontinued his/her studies in the middle of a semester or who had not appeared for Board Examination of current semester of study, can apply and get readmission in the same semester in the following or subsequent academic years.
- A last date, usually 15 days before the day of re-opening of Institution for the semester, is being fixed and announced for the readmission of students.
- The percentage of attendance for the readmitted candidates shall be calculated from the actual of their readmission.
- Those who have not appeared for any semester examination have to undergo the study of the concerned semester again after getting readmission from the Chairman/Board Examinations.

### PROCEDURE FOR COMPLETING THE DIPLOMA COURSE

- 1) The candidate on completion of studies in each year / semester should register for the examinations of all the subjects of the current year / semester as well as for all the arrear subjects of all previous years / semesters.
- 2) A student having shortage of attendance in a semester should repeat the same semester in the next academic year. Similarly, a student who had not attended at least a single paper (theory or practical) of a particular semester examination, cannot continue his/her studies in the next semester, even he/she had enough attendance in that semester.

- 3) For admission to the Autonomous Examination, a student should have satisfactorily completed the prescribed course of study and should have put in not less than 80% of attendance of the total number of working hours during the semester. However, students are expected to put in 100% attendance.
- 4) For a pass in the Autonomous Examination, students must secure a minimum of 40% marks in theory papers and 50% in practicals.

### Outcome Based Education(OBE)

Our institution is practicing Outcome Based Education (OBE) which is student-centered instruction model that focuses on measuring student performance through outcomes. Outcomes include knowledge, skills and attitudes.

In the OBE model, the required knowledge and skill sets for a particular diploma programme is predetermined and the students are evaluated for all the required parameters (Outcomes) during the course of the program.

The OBE model measures the progress of the graduate in four parameters, which are

- Program Educational Objectives (PEO)
- Program Specific Outcomes (PSO)
- Program Outcomes (PO)
- Course Outcomes (CO)

Program Educational Objectives (PEO) are broad statements that describe the career and professional accomplishments that the program is preparing the graduates to achieve. PEO's are measured 4-5 years after graduation. Program Specific Outcomes(PSO) are the statements that describe what the graduates of specific engineering program should be able to do.

Program Outcomes(PO) are narrower statements that describe what students are expected to know and be able to do by the time of graduation. Course Outcomes(CO) are the measurable parameters which evaluates each students performance for each course that the student undertakes in every semester.

The teaching learning process and assessment are being carried out in accordance with the revised Bloom's Taxonomy.

According to revised Bloom's taxonomy, the levels in cognitive domain are as follows:

Level	Descriptor	Level of attainment
1	Remembering	Recalling from memory of previously learned material
2	Understanding	Explaining ideas or concepts
3	Applying	Using information in another familiar situation
4	Analysing	Breaking information into part to explore Understandings and relationships
5	Evaluating	Justifying a decision or course of action
6	Creating	Generating new ideas, products or new ways of Viewing things.
